Learn IT

A PROJECT REPORT

Submitted By

Sourabh Kumar
(University Roll No- 2000290140123)

Himanshu Tomar
(University Roll No-2000290140051)

Submitted in partial fulfilment of the
Requirements for the Degree of

MASTER OF COMPUTER APPLICATIONS

Under the Supervision of
Mr. Ankit Verma
Assistant Professor,
KIET Group of Institutions

Submitted to

DEPARTMENT OF COMPUTER APPLICATIONS
KIET Group of Institutions, Ghaziabad
Uttar Pradesh-201206

CERTIFICATE

Certified that **Sourabh Kumar <Enrollment No-200029014005808>, Himanshu Tomar <Enrollment No-200029014005736** have carried out the project work having "**Title of Report – Learn IT**" for Master of Computer Applications from Dr. A.P.J. Abdul Kalam Technical University (AKTU**)** (formerly UPTU), Technical University, Lucknow under my supervision. The project report embodies original work, and studies are carried out by the student himself / herself and the contents of the project report do not form the basis for the award of any other degree to the candidate or to anybody else from this or any other University/Institution.

Date:

 Sourabh Kumar (2000290140123)

 Himanshu Tomar (2000290140051)

This is to certify that the above statement made by the candidate is correct to the best of my knowledge.

Date:

 Mr. Ankit Verma
 Assistant Professor
 Department of Computer Applications
 KIET Group of Institutions, Ghaziabad

Signature of Internal Examiner **Signature of External Examiner**

Dr. Ajay Shrivastava
Head, Department of Computer Applications
KIET Group of Institutions, Ghaziabad

ABSTRACT

This paper discusses about learning new   content related to IT and other Professions . We are able to take decisions by knowledge but knowledge come by reading and understanding. Learn IT is a way to learn things and gaining knowledge for improving your decision making. Learn IT is a optimized for learning ,reading and self evaluation platform. It is a freemium educational website for learning and reading. Learn IT offers contents related to each and every field of different professions. Learn IT developed in 2021. In the premises of KIET group of institutions. Learn IT held one of biggest workforce which is continuously trying for providing the best and relatable content to its users.

ACKNOWLEDGEMENTS

TABLE OF CONTENTS

LIST OF TABLES

This is a table that contains a Tested user entered data.

Introduction

1.1 Project description

Learn IT is important in our social life due to its strength in providing enhanced Knowledge. Such a system can suggest a set of integrated content to users based on their interest, or the popularities of the course. A Learn IT system is used for the purpose of suggesting content for user to study and gaining knowledge. They direct users towards those content which can meet their needs through cutting down large database of Information. A recommender system, or a recommendation system (sometimes replacing 'system' with a synonym such as platform or engine), is a subclass of information filtering system that seeks to predict the "rating" or "preference" a user would give to an item. They are primarily used in Professional industries. Learn IT also help users to find the course of their choices based on the interest experience of other users in efficient and effective manner without wasting much time in useless browsing. Keywords: Filtering, Recommendation System, Recommender.

1.2 Project Scope

A Online Study system has become an indispensable component in various Online platform applications. Online study collect information about the user's preferences of different content by two ways, either implicitly or explicitly . An implicit acquisition of user information typically involves observing the user's behavior such as Reading books, downloaded applications.

On the other hand, a direct procurement of information typically involves collecting the user's previous ratings or history. Collaborative filtering (CF) is the way of filtering or calculating items through the sentiments of other people . It first gathers the information given by individuals and then recommends course to the target user based on like-minded people with similar tastes and interests in the past. Additional impression on which some recommender systems are based is clustering. Clustering is a popular unsupervised data mining tool that is used for partitioning a given dataset into homogeneous groups based on some similarity or dissimilarity metric . Collaborative filtering and clustering have been discussed in detail in the next section. Hybrid cluster and optimization approach is applied to improve movie prediction accuracy. Such a hybrid approach has been used to overcome the limitations of typical content-based and collaborative Online Study systems. For clustering, k-means algorithm is applied and for optimization, cuckoo search optimization is implemented. K-means algorithm is an enormously greater clustering algorithm when compared to other clustering methods in relations of time, complexity or effectiveness for a particular number of clusters . Clustering algorithm with a bio-inspired algorithm such as cuckoo search delivers optimize results. The cuckoo search has shown best performance when compared with other algorithms such as genetic algorithms and particle swarm optimization. Simulations and comparison of the cuckoo search were greater to these existing algorithms for multimodal objective functions. To find the best results we have to find the most suitable weight among all possible ones.

1.3 Hardware / Software used in Project

Hardware Used in Project

- Window 10
- 8 RAM
- i7 processor
- With 512 GB SSD

Software Used in Project

- HTML & CSS
- JavaScript
- JSP

Feasibility Study

2.1 Technical feasibility

The objective of the technical feasibility step is **to confirm that the product will perform and to verify that there are no production barriers**. Product: The product of this activity is a working model.

2.2 Operational Feasibility

The operational feasibility to help users find items that they deem of interest to them. They can be seen as an application of data mining process. In this paper, a new recommender system based on multi-features is introduced. Demographic and psychographic features are used to asses similarities between users.

Database Design

3.1 Flow Chart
3.2

Form Design

4.1 Input / Output Form (Screenshot)

Input Screenshot

Landing Page
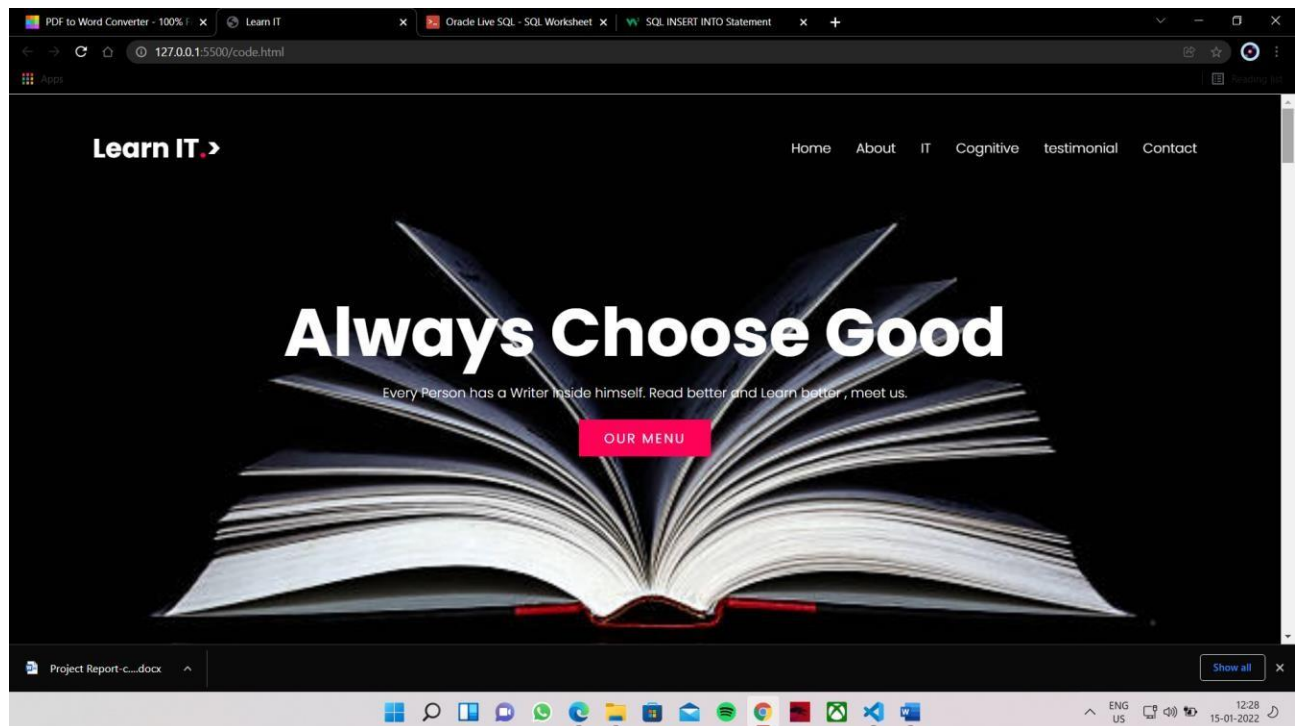

Output Screenshot
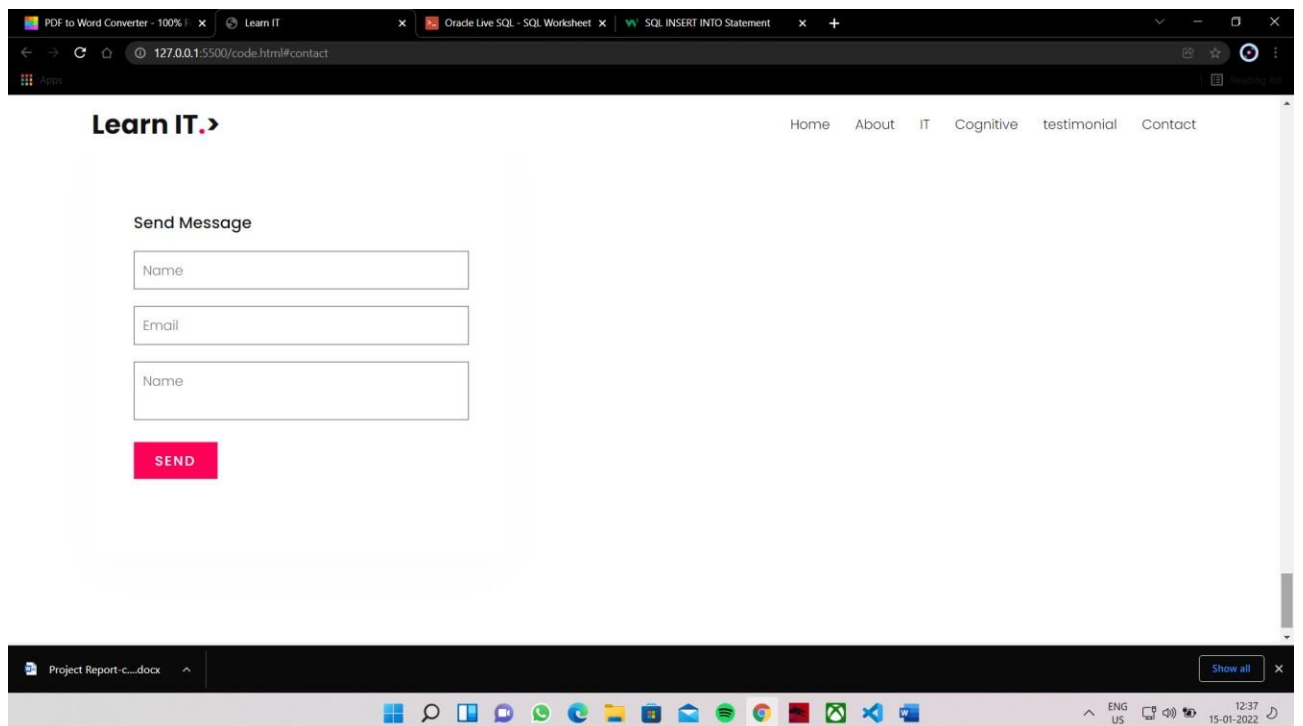

Testing

- Check whether the machine working properly on Search Engine.
- Check is there any issue in the implementation of Website.
- Check the Data provided is correct whether is correct or not.

Conclusion

                    Learn IT developed in 2021. In the premises of KIET group of institutions. Learn IT helds one of biggest workforce

                    which is continuously trying for providing the best and relatable content to its users.</p>

                <p>Success is all about taking new initiatives. I started developing Learn IT . At the moment, I was providing

                    training on Java. Meanwhile, I thought, why not to spread my knowledge to the world. So I started developing Learn IT.

                    If you try to help others, God will help you surely. A student from another teacher came to me and said, Sir I asked for the

                    slide (PPT) from the Sir (Don't want to mention any name) to my sir and he scolded me. I told him not to worry, we are nothing;

                    we haven't made Java, we are just delivering

                    the things in a better way, since I don't use any PPT, I will put all my notes on the web, you people can learn from there.</p>
